In a world wherein technology plays a big role in human beings' comfort, leisure, and learning, the personal computer and the Internet have become very indispensable tools. However, as more and more people become dependent on these two, you come to see others who take advantage of computer users everywhere and cause them nuisance and damage - using the same technology that's meant to make life easier. It's no wonder then why it's very hard nowadays to keep your computers free of unwanted advertisements. As if spams and viruses are not bad enough, people invented spyware and adware, which basically work together to bring your Internet connection experience to a crawl, as well as bombard your computer with popup advertisements, and compromise your privacy and security. Spywares and adwares are not only annoying but more often than not tend to damage your computer software and sometimes can even cause some damage to your hardware too. These annoying bugs have become a bane for internet browsers worldwide. They have become a normal occurrence that we sometimes tend to ignore but God forbid we should never accept. Spyware and Adware had done better than viruses as a threat to the theft of user information and break down of computer performance. Adware is a form of spam that automatically lets advertisements pop out of nowhere. The advertising ads may involve websites or products which you will be forced to view even if you really do not want to pay attention to it. Spyware on the other hand, covertly monitors your Internet and computer use. Some spyware are malicious, in such a way that some collect passwords, user ID's, credit card numbers, and some other sensitive details about the user. Besides giving a user problems connected to privacy and ethics, spyware robs you through usage of the computer's memory, as well as eating of bandwidth making Internet exploration slower than ever. It's a sad reality but here's the good news! This book will be your definitive guide in protecting your computer from adware and spyware threats, to guarantee your computer's optimal security and performance!
