Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series)

Irena Swanson, Craig Huneke

Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series)
Irena Swanson, Craig Huneke
Integral closure has played a role in number theory and algebraic geometry since the nineteenth century, but a modern formulation of the concept for ideals perhaps began with the work of Krull and Zariski in the 1930s. It has developed into a tool for the analysis of many algebraic and geometric problems. This book collects together the central notions of integral closure and presents a unified treatment. Techniques and topics covered include: behavior of the Noetherian property under integral closure, analytically unramified rings, the conductor, field separability, valuations, Rees algebras, Rees valuations, reductions, multiplicity, mixed multiplicity, joint reductions, the Briançon-Skoda theorem, Zariski's theory of integrally closed ideals in two-dimensional regular local rings, computational aspects, adjoints of ideals and normal homomorphisms. With many worked examples and exercises, this book will provide graduate students and researchers in commutative algebra or ring theory with an approachable introduction leading into the current literature.

From reader reviews:

Ryan Mendoza:

Book is to be different for every grade. Book for children until eventually adult are different content. As it is known to us that book is very important for us. The book Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series) was making you to know about other knowledge and of course you can take more information. It is rather advantages for you. The guide Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series) is not only giving you much more new information but also to get your friend when you truly feel bored. You can spend your current spend time to read your e-book. Try to make relationship with the book Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series). You never experience lose out for everything should you read some books.

James Shipp:

Hey guys, do you wishes to finds a new book you just read? May be the book with the subject Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series) suitable to you? Often the book was written by well known writer in this era. Typically the book untitled Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series)is one of several books which everyone read now. This kind of book was inspired a number of people in the world. When you read this book you will enter the new dimensions that you ever know prior to. The author explained their concept in the simple way, and so all of people can easily to recognise the core of this e-book. This book will give you a great deal of information about this world now. To help you to see the represented of the world with this book.

Ladonna Warren:

The book untitled Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series) contain a lot of information on the item. The writer explains her idea with easy approach. The language is very simple to implement all the people, so do not worry, you can easy to read that. The book was written by famous author. The author brings you in the new era of literary works. It is easy to read this book because you can continue reading your smart phone, or product, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can open their official web-site as well as order it. Have a nice examine.

Larry Luis:

In this period globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of references to get information example: internet, paper, book, and soon. You can observe that now, a lot of publisher that print many kinds of book. The actual book that

recommended for you is Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series) this guide consist a lot of the information with the condition of this world now. This specific book was represented so why is the world has grown up. The words styles that writer value to explain it is easy to understand. Typically the writer made some investigation when he makes this book. This is why this book suitable all of you.
