Satellite Monitoring of the Earth (Wiley Series in Remote Sensing) Karl-Heinz Szekiela

"Satellite Monitoring of the Earth" is a concise survey of the state-of-the-art in satellite remote sensing of the Earth, incorporating a multidisciplinary approach to the diverse fields which employ satellite technology. It presents a chronological account of satellite platforms and selected sensors, and discusses interactions between energy and atmospheric constituents. The book also describes spectral signatures of objects, concepts in data interpretation, and various aspects of observations over continents (including geological and vegetation patterns) and over oceans. Case studies are included.
