The Economics of Gambling and National Lotteries (International Library of Critical Writings in Economics series) Leighton Vaughan Williams

In recent years there has been a substantial global increase in interest in the study of gambling. To some extent this has mirrored seismic changes in the way that betting and gaming markets worldwide are taxed and regulated. This has heightened interest in a wide range of issues related to this sector including its regulation, public policy and commercial strategy as well as the ideal structure of gambling taxes and devising optimal responses to environmental changes, such as the growth of online gambling.

This volume, by bringing together the work of leading scholars, will cover the spectrum of such perspectives, as well as examining the efficiency of betting markets, to provide an assessment of developments and current understanding in the study of the economics of gambling.

This timely collection will be an immensely valuable resource for academics, policy makers, those commercially involved in the betting and gaming sectors as well as the interested layman.
