An Investigation into the Detection and Mitigation of Denial of Service (DoS) Attacks: Critical Information Infrastructure Protection

An Investigation into the Detection and Mitigation of Denial of Service (DoS) Attacks: Critical Information Infrastructure Protection

Around the globe, nations face the problem of protecting their Critical Information Infrastructure, normally referred to as Cyber Space. In this monograph, we capture FIVE different aspects of the problem; High speed packet capture, Protection through authentication, Technology Transition, Test Bed Simulation, and Policy and Legal Environment. The monograph is the outcome of over three years of cooperation between India and Australia.
