## **Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26)**

This volume presents the papers based upon lectures given at the 1999 Seminaire de Mathematiques Superieurs held in Montreal. It includes contributions from many of the most active researchers in the field. This subject has been in a remarkably active state of development throughout the past three decades, resulting in new motivation for study in surprisingly different directions. Beyond the intrinsic interest in the study of integrable models of many-particle systems, spin chains, lattice and field theory models at both the classical and the quantum level, and completely solvable models in statistical mechanics, there have been new applications in relation to a number of other fields of current interest. These fields include theoretical physics and pure mathematics, for example the Seiberg-Witten approach to supersymmetric Yang-Mills theory, the spectral theory of random matrices, topological models of quantum gravity, conformal field theory, mirror symmetry, quantum cohomology, etc. This collection gives a nice cross-section of the current state of the work in the area of integrable systems which is presented by some of the leading active researchers in this field. The scope and quality of the articles in this volume make this a valuable resource for those interested in an up-to-date introduction and an overview of many of the main areas of study in the theory of integral systems.

### **From reader reviews:**

#### **Vicky Moore:**

The book Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26) will bring someone to the new experience of reading a book. The author style to clarify the idea is very unique. In the event you try to find new book to study, this book very suitable to you. The book Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26) is much recommended to you to study. You can also get the e-book from the official web site, so you can easier to read the book.

#### **James Goodman:**

This Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26) is great guide for you because the content which can be full of information for you who else always deal with world and still have to make decision every minute. This book reveal it data accurately using great manage word or we can declare no rambling sentences within it. So if you are read this hurriedly you can have whole facts in it. Doesn't mean it only provides you with straight forward sentences but challenging core information with beautiful delivering sentences. Having Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26) in your hand like having the world in your arm, details in it is not ridiculous 1. We can say that no e-book that offer you world within ten or fifteen second right but this book already do that. So , this is certainly good reading book. Hello Mr. and Mrs. hectic do you still doubt that will?

#### **Anita Winn:**

On this era which is the greater particular person or who has ability in doing something more are more treasured than other. Do you want to become one of it? It is just simple way to have that. What you must do is just spending your time almost no but quite enough to enjoy a look at some books. One of many books in the top collection in your reading list is Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26). This book that is qualified as The Hungry Hillsides can get you closer in getting precious person. By looking way up and review this guide you can get many advantages.

#### **Eulalia Perry:**

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book ended up being rare? Why so many problem for the book? But almost any people feel that they enjoy with regard to reading. Some people likes studying, not only science book but also novel and Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26) or perhaps others sources were given knowledge for you. After you know how the great a book, you feel desire to read more and more. Science publication was created for teacher or students especially. Those textbooks are helping them to bring their knowledge. In different case, beside science e-book, any other book likes Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26) to make your spare time a lot more colorful. Many types of book like this.
