International Electronic Countermeasures Handbook: 2000 Edition (Electronic defence library)

Journal of Electronic Defense

The year 2000 version of this electronic countermeasures handbook examines all types of protection systems in service worldwide - from missile approach and radar warning receivers, jamming systems and ECM suites to naval and air-borne decoy systems and expendables. This new edition contains information on 37 new systems, and features updated data on individual companies, product descriptions, and more. The book also describes known threats, providing details of missiles which can be launched from static and mobile ground-based sites, from ships, or from aircraft.
