Outlook on Space Law over the Next 30 Years Gabriel Lafferranderie

This book is neither a historical treatise on the genesis and development of space law, nor a survey of the corpus, nor even a work of legal makebelieve, but simply an essay pursuing a line of enquiry opened up by the members of the European Centre for Space Law. It sets out to chart future trends in the light of the emergence of space law as a branch of international law and of the development of space activities themselves (new activities, new players, interpenetration of space law and national laws), a branch in which the rules and forms of international cooperation acquire a new dimension, transcending the concept of global law. It is essentially prompted by a deep aspiration to see a rebirth - a revival - of that law.
