Designed to support the way you learn

Whether you learn best by applying knowledge, assimilating information through visuals, working equations, or reading explanations of concepts, Milo Koretsky's *Engineering and Chemical Thermodynamics* provides the support you need to develop a deeper and more complete understanding of thermodynamics and its application to real-world problems.

Highlights

- An integrated presentation of molecular concepts with thermodynamic principles provides greater access to the material than mathematical derivations alone.
- Learning objectives and chapter summaries are organized from the most significant concepts down.
- Schematic presentations of key concepts help visual learners.
- End-of-chapter problems promote real synthesis and conceptual understanding.
- Questions about key points and examples provide opportunities for reflection.
- Coverage of equilibrium in the solid phase brings you up-to-speed on this increasingly important topic.

ThermoSolver software—solve complex problems quickly and easily!

Improve your ability to solve problems and understand key concepts with *ThermoSolver* software! This easy-to-use, menu-driven software enables you to perform more complex calculations, so you can explore a wide range of problems. *ThermoSolver* software is integrated with equations from the text, allowing you to make connections between thermodynamic concepts and the software output. *ThermoSolver* is **FREE** for download from the Student Companion Site at www.wiley.com/college/koretsky.

From reader reviews:

Marian Jackson:

What do you concerning book? It is not important along with you? Or just adding material when you require something to explain what you problem? How about your time? Or are you busy man or woman? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Everyone has many questions above. They need to answer that question mainly because just their can do that will. It said that about reserve. Book is familiar on every person. Yes, it is appropriate. Because start from on kindergarten until university need this kind of Engineering and Chemical Thermodynamics to read.

Norris Patterson:

As people who live in the particular modest era should be change about what going on or data even knowledge to make these people keep up with the era and that is always change and make progress. Some of you maybe will update themselves by looking at books. It is a good choice for you personally but the problems coming to an individual is you don't know what one you should start with. This Engineering and Chemical Thermodynamics is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and need in this era.

Eric Beasley:

Reading can called thoughts hangout, why? Because when you are reading a book mainly book entitled Engineering and Chemical Thermodynamics your thoughts will drift away trough every dimension, wandering in each and every aspect that maybe unfamiliar for but surely will become your mind friends. Imaging just about every word written in a publication then become one contact form conclusion and explanation which maybe you never get before. The Engineering and Chemical Thermodynamics giving you one more experience more than blown away the mind but also giving you useful information for your better life on this era. So now let us show you the relaxing pattern at this point is your body and mind is going to be pleased when you are finished reading through it, like winning a casino game. Do you want to try this extraordinary spending spare time activity?

Joshua Smith:

Don't be worry should you be afraid that this book will probably filled the space in your house, you can have it in e-book method, more simple and reachable. This Engineering and Chemical Thermodynamics can give you a lot of pals because by you considering this one book you have thing that they don't and make a person more like an interesting person. This specific book can be one of one step for you to get success. This reserve offer you information that perhaps your friend doesn't realize, by knowing more than other make you to be great folks. So , why hesitate? We need to have Engineering and Chemical Thermodynamics.
