Geographic Information System Jatin Pandey, Darshana Pathak

Geographic Information System (GIS) aims to organize complex interrelation between different layers of information through a process of gathering, analysing, processing, storing, and presenting the spatial data and images available through different sources. It integrates hardware, software, and data for capturing, managing, analysing, and displaying all forms of geographically referenced information. This book presents theory, methods, and latest research finding for problem-solving and decision-making using GIS-based technologies.

Key Features:

- Explains raster and vector data and attributive database.
- Discusses application of GIS in geotechnical engineering, transport engineering, and water resource engineering.
- Includes model question papers and is well illustrated

Contents:

Introduction to Geographic Information System

- Information System
- Geographic Information System
- Cartography and GIS
- GIS Database
- GIS Data Type
- GIS Data Models
- Topology and GIS

Raster and vector data

- Vector Data
- Raster Data
- Raster Encoding Methods
- Shape of the Earth
- Transformation
- Digitization

Attribute database and overlay

- Attribute Data
- Relations
- GIS Functionality
- Spatial Query
- Vector Data Queries
- Classification
- Overlay

- Buffer
- Inter-visibility
- Network Theory

Remote Sensing and Digital Image Processing

- Remote Sensing
- Sources of Energy for Remote Sensing
- Interaction of Electromagnetic Radiation with Atmosphere
- Interaction of Electromagnetic Radiation with the Earth's Surface
- Use of Electromagnetic Spectrum for Remote Sensing Purposes
- Process of Remote Sensing
- Sensors and Platforms
- Orbits and Swaths
- Platforms
- Image Processing
- Applications of Remote Sensing

Applications of GIS

- GIS in Planning and Management of Utility Lines
- Geotechnical Engineering
- Water Resource Engineering
- Example of GIS Application Development with Open Source

Numerical Problems

- Scale Conversions
- Playing with Database

Other books on GIS:

Geoinformatics for Climate Change Studies (ISBN: 9788179934098)

Tectonics of the Eastern Continental Margin (ISBN: 9788179934081)

HealthGIS: managing health geospatially (ISBN: 9788179933251)

From reader reviews:

Winston Nakashima:

Spent a free time and energy to be fun activity to complete! A lot of people spent their free time with their family, or their very own friends. Usually they carrying out activity like watching television, planning to beach, or picnic in the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your free time/ holiday? May be reading a book might be option to fill your totally free time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to try out look for book, may be the e-book untitled Geographic Information System can be fine book to read. May be it may be best activity to you.

Mary Alejandro:

Can you one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you find out the inside because don't evaluate book by its handle may doesn't work this is difficult job because you are frightened that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer could be Geographic Information System why because the fantastic cover that make you consider in regards to the content will not disappoint anyone. The inside or content will be fantastic as the outside or maybe cover. Your reading sixth sense will directly show you to pick up this book.

Lois Huseby:

Many people spending their time by playing outside along with friends, fun activity using family or just watching TV 24 hours a day. You can have new activity to pay your whole day by studying a book. Ugh, ya think reading a book can definitely hard because you have to bring the book everywhere? It fine you can have the e-book, bringing everywhere you want in your Smart phone. Like Geographic Information System which is finding the e-book version. So , try out this book? Let's notice.

Eunice Huynh:

Do you like reading a book? Confuse to looking for your best book? Or your book ended up being rare? Why so many query for the book? But almost any people feel that they enjoy intended for reading. Some people likes reading, not only science book but in addition novel and Geographic Information System or others sources were given information for you. After you know how the truly amazing a book, you feel desire to read more and more. Science publication was created for teacher or maybe students especially. Those ebooks are helping them to add their knowledge. In other case, beside science book, any other book likes Geographic Information System to make your spare time considerably more colorful. Many types of book like this.
