Surgical Management of Congenital Heart Disease II: Single Ventricle and Hypoplastic Left Heart Syndrome Aortic Arch Anomalies Septal Defects and ... of Thoracic Arteries and Veins A Video Manual Viktor Hraška, Peter Murín

Approximately 120 different surgical procedures are used to correct congenital heart diseases, and the burden that this places on the surgeon is compounded by the exceptional complexity of the techniques and the rarity of many of the lesions. Training is problematic, not least because of legal issues, and currently available texts, drawings and images are no substitute for real 'live' surgery. Against this background, the authors have set out to create an interactive multimedia manual that covers many aspects of congenital heart surgery. Each heart defect is addressed in an individual chapter, elaborating specific surgical anatomy and indication for surgery of heart defect first, followed by video clips depicting the operative approach and technique. The clips are accompanied by a clear descriptive narrative and patient history and diagnostic images are available to provide a clear backdrop to the operation. The chosen format makes this manual not only a very powerful teaching tool for practicing cardiac surgeons and surgeons in training but also a valuable source of information for related services such as pediatric and adult cardiologists, cardiac anesthesiologist, cardiac intensivists, perfusionists and medical students.

From reader reviews:

George Thomas:

Nowadays reading books become more than want or need but also work as a life style. This reading practice give you lot of advantages. The huge benefits you got of course the knowledge even the information inside the book in which improve your knowledge and information. The info you get based on what kind of e-book you read, if you want send more knowledge just go with education and learning books but if you want feel happy read one with theme for entertaining for instance comic or novel. The Surgical Management of Congenital Heart Disease II: Single Ventricle and Hypoplastic Left Heart Syndrome Aortic Arch Anomalies Septal Defects and ... of Thoracic Arteries and Veins A Video Manual is kind of book which is giving the reader erratic experience.

Maria Casillas:

Precisely why? Because this Surgical Management of Congenital Heart Disease II: Single Ventricle and Hypoplastic Left Heart Syndrome Aortic Arch Anomalies Septal Defects and ... of Thoracic Arteries and Veins A Video Manual is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will shock you with the secret the idea inside. Reading this book close to it was fantastic author who have write the book in such wonderful way makes the content inside of easier to understand, entertaining method but still convey the meaning completely. So , it is good for you because of not hesitating having this anymore or you going to regret it. This amazing book will give you a lot of rewards than the other book get such as help improving your ability and your critical thinking means. So , still want to postpone having that book? If I ended up you I will go to the book store hurriedly.

Irene Parker:

As we know that book is very important thing to add our knowledge for everything. By a guide we can know everything we want. A book is a list of written, printed, illustrated or blank sheet. Every year seemed to be exactly added. This book Surgical Management of Congenital Heart Disease II: Single Ventricle and Hypoplastic Left Heart Syndrome Aortic Arch Anomalies Septal Defects and ... of Thoracic Arteries and Veins A Video Manual was filled concerning science. Spend your time to add your knowledge about your research competence. Some people has diverse feel when they reading any book. If you know how big selling point of a book, you can experience enjoy to read a reserve. In the modern era like now, many ways to get book you wanted.

Adam Gutierrez:

As a pupil exactly feel bored to help reading. If their teacher requested them to go to the library in order to make summary for some publication, they are complained. Just tiny students that has reading's heart or real their passion. They just do what the instructor want, like asked to go to the library. They go to at this time

there but nothing reading significantly. Any students feel that reading is not important, boring and also can't see colorful images on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Surgical Management of Congenital Heart Disease II: Single Ventricle and Hypoplastic Left Heart Syndrome Aortic Arch Anomalies Septal Defects and ... of Thoracic Arteries and Veins A Video Manual can make you sense more interested to read.
