Google Android dominates the mobile market, and by targeting Android, your apps can run on most of the phones and tablets in the world. This new fourth edition of the #1 book for learning Android covers all modern Android versions from Android 4.1 through Android 5.0. Freshly added material covers new Android features such as Fragments and Google Play Services. Android is a platform you can't afford not to learn, and this book gets you started.

Android is a software toolkit for mobile phones and tablets, created by Google. It's inside more than a billion devices, making Android the number one platform for application developers. Your own app could be running on all those devices!

Getting started developing with Android is easy. You don't even need access to an Android phone, just a computer where you can install the Android SDK and the emulator that comes with it. Within minutes, Hello, Android gets you creating your first working application: Android's version of "Hello, World." From there, you'll build up a more substantial example: an Ultimate Tic-Tac-Toe game. By gradually adding features to the game, you'll learn about many aspects of Android programming, such as creating animated user interfaces, playing music and sound effects, building location-based services (including GPS and cell-tower triangulation), and accessing web services. You'll also learn how to publish your applications to the Google Play Store.

This fourth edition of the bestselling Android classic has been revised for Android 4.1-4.3 (Jelly Bean), 4.4 (KitKat), and Android 5.0 (Lollipop). Topics have been streamlined and simplified based on reader feedback, and every page and example has been reviewed and updated for compatibility with the latest versions of Android.

If you'd rather be coding than reading about coding, this book is for you.

**From reader reviews:**

**Lucas Florio:**

What do you think about book? It is just for students as they are still students or that for all people in the world, what best subject for that? Just simply you can be answered for that problem above. Every person has different personality and hobby for every other. Don't to be obligated someone or something that they don't wish do that. You must know how great in addition to important the book Hello, Android: Introducing Google's Mobile Development Platform. All type of book would you see on many solutions. You can look for the internet options or other social media.

**Rosalie Dietrich:**

As people who live in typically the modest era should be revise about what going on or info even knowledge to make them keep up with the era and that is always change and advance. Some of you maybe can update themselves by reading through books. It is a good choice for yourself but the problems coming to you is you don't know which one you should start with. This Hello, Android: Introducing Google's Mobile Development Platform is our recommendation so you keep up with the world. Why, since this book serves what you want and want in this era.

**James Yancey:**

Reading a book for being new life style in this 12 months; every people loves to examine a book. When you go through a book you can get a lots of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your study, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these us novel, comics, as well as soon. The Hello, Android: Introducing Google's Mobile Development Platform will give you a new experience in examining a book.

**Bernice Capps:**

As a student exactly feel bored to be able to reading. If their teacher inquired them to go to the library as well as to make summary for some publication, they are complained. Just little students that has reading's heart and soul or real their passion. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that looking at is not important, boring along with can't see colorful pics on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Hello, Android: Introducing Google's Mobile Development Platform can make you really feel more interested to read.
