Student's Quest Guide: Aristotle Leads the Way (The Story of Science) Johns Hopkins University

This rich, multidisciplinary curriculum to accompany Joy Hakim's *The Story of Science: Aristotle Leads the Way* covers astronomy, physics, and chemistry from Mesopotamia to the Middle Ages. The course of study is divided into five units. Each unit includes an introduction (with background information, a materials list, and standards correlated to the narrative and teaching materials) and nine class sessions. The *Teacher's Quest Guide* includes embedded reading strategies to facilitate greater comprehension, hands-on science experiments to encourage learning by discovery, timeline activities, and several review and assessment activities for each unit. Students will enjoy a time-traveling cartoon character, Professor Quest, who summarizes the main point of each lesson. Multiple cross-curricular links suggest additional activities in math, language arts, history, art, and other subjects to extend learning. The accompanying *Student's Quest Guide* includes all necessary student worksheets. This curriculum is ideal for traditional science classes, enrichment programs, and home-school settings.
