## **The Foundations of Geometry (Classic Reprint)** David Hilbert

Professor Hilbert as a course of lectures on euclidean geometry at the University of Gttingen during the winter semester of 1898-1899. The results of his investigation were re-arranged and put into the form in which they appear here as a memorial address published in connection with the celebration at the unveiling of the Gauss-W eber monument at Gottingen, in June, 1899. In the French edition, which appeared soon after, Professor Hilbert made some additions, particularly in the concluding remarks, where he gave an account of the results of a recent investigation made by Dr. Dehn. These additions have been incorporated in the following translation. As a basis for the analysis of our intuition of space. Professor Hilbert commences his discussion by considering three systems of things which he calls points, straight lines, and planes, and sets up a system of axioms connecting these elements in their mutual relations. The purpose of his investigations is to discuss systematically the relations of these axioms to one another and also the bearing of each upon the logical development of euclidean geometry. Among the important results obtained, the following are worthy of special mention: 1. The mutual independence and also the compatibility of the given system of axioms is fully discussed by the aid of various new systems of geometry which are introduced. 2. The most important propositions of euclidean geometry are demonstrated in such a manner as to show precisely what axioms underlie and make possible the demonstration. 3. The axioms of congruence are introduced and made the basis of the definition of geometric displacement. 4. (Typographical errors above are due to OCR software and don't occur in the book.)

## **About the Publisher**

Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology.

### **From reader reviews:**

#### **James Marcotte:**

In this 21st hundred years, people become competitive in each way. By being competitive today, people have do something to make them survives, being in the middle of the actual crowded place and notice by simply surrounding. One thing that sometimes many people have underestimated the item for a while is reading. That's why, by reading a e-book your ability to survive boost then having chance to remain than other is high. In your case who want to start reading any book, we give you this The Foundations of Geometry (Classic Reprint) book as beginner and daily reading book. Why, because this book is usually more than just a book.

#### **Edward Tuttle:**

As people who live in often the modest era should be update about what going on or facts even knowledge to make these people keep up with the era that is certainly always change and advance. Some of you maybe will update themselves by examining books. It is a good choice in your case but the problems coming to you actually is you don't know what one you should start with. This The Foundations of Geometry (Classic Reprint) is our recommendation to help you keep up with the world. Why, because book serves what you want and want in this era.

#### **Jill Barks:**

This The Foundations of Geometry (Classic Reprint) are generally reliable for you who want to certainly be a successful person, why. The key reason why of this The Foundations of Geometry (Classic Reprint) can be one of the great books you must have is definitely giving you more than just simple reading through food but feed you actually with information that maybe will shock your earlier knowledge. This book will be handy, you can bring it just about everywhere and whenever your conditions at e-book and printed ones. Beside that this The Foundations of Geometry (Classic Reprint) forcing you to have an enormous of experience such as rich vocabulary, giving you trial of critical thinking that we all know it useful in your day action. So , let's have it and enjoy reading.

#### **Maureen Guzman:**

The guide untitled The Foundations of Geometry (Classic Reprint) is the guide that recommended to you to study. You can see the quality of the e-book content that will be shown to an individual. The language that creator use to explained their way of doing something is easily to understand. The writer was did a lot of exploration when write the book, hence the information that they share for you is absolutely accurate. You also will get the e-book of The Foundations of Geometry (Classic Reprint) from the publisher to make you much more enjoy free time.
