## **Electron Diffraction and High-Resolution Electron Microscopy of Mineral Structures** Victor A. Drits

The decision of Springer-Verlag to publish this book in English came as a pleasant surprise. The fact is that I started writing the first version of the book back in 1978. I wished to attract attention to potentialities inherent in selected-area electron diffraction (SAED) which, for various reasons, were not being put to use. By that time, I had at my disposal certain structural data on natural and synthetic minerals obtained using SAED and high-resolution electron microscopy (HREM), and this stimulated my writing this book. There were several aspects concerning these data that I wished to emphasize. First, it was mostly new and understudied minerals that possess the peculiar structural features studied by SAED and HREM. This could interest mineralogists, crystallochemists, and crystallographers. Second, the results obtained indicated that, under certain conditions, SAED could be an effective, and sometimes the only possible, method for structure analysis of minerals. This inference was of primary importance, since fine dispersion and poor crystallinity of numerous natural and synthetic minerals makes their structure study by conventional diffraction methods hardly possible. Third, it was demonstrated that in many cases X-ray powder diffraction analysis of dispersed minerals ought to be combined with SAED and local energy dispersion analysis. This was important, since researchers in structural mineralogy quite often ignored, and still ignore even the simplest information which is readily available from geometrical analysis of SAED patterns obtained from microcrystals.

### **From reader reviews:**

#### **Jonathan Flannagan:**

Do you have favorite book? In case you have, what is your favorite's book? Guide is very important thing for us to understand everything in the world. Each publication has different aim as well as goal; it means that publication has different type. Some people really feel enjoy to spend their time and energy to read a book. They are reading whatever they consider because their hobby is actually reading a book. Consider the person who don't like examining a book? Sometime, man feel need book after they found difficult problem or exercise. Well, probably you will require this Electron Diffraction and High-Resolution Electron Microscopy of Mineral Structures.

#### **Micheal McDonough:**

The book Electron Diffraction and High-Resolution Electron Microscopy of Mineral Structures make you feel enjoy for your spare time. You may use to make your capable considerably more increase. Book can to become your best friend when you getting anxiety or having big problem with your subject. If you can make reading a book Electron Diffraction and High-Resolution Electron Microscopy of Mineral Structures to be your habit, you can get far more advantages, like add your own personal capable, increase your knowledge about a number of or all subjects. You can know everything if you like wide open and read a e-book Electron Diffraction and High-Resolution Electron Microscopy of Mineral Structures. Kinds of book are a lot of. It means that, science book or encyclopedia or others. So , how do you think about this e-book?

#### **Mary Norman:**

The ability that you get from Electron Diffraction and High-Resolution Electron Microscopy of Mineral Structures could be the more deep you rooting the information that hide into the words the more you get serious about reading it. It does not mean that this book is hard to understand but Electron Diffraction and High-Resolution Electron Microscopy of Mineral Structures giving you enjoyment feeling of reading. The author conveys their point in a number of way that can be understood by anyone who read the item because the author of this reserve is well-known enough. This particular book also makes your own personal vocabulary increase well. Therefore it is easy to understand then can go along, both in printed or e-book style are available. We highly recommend you for having that Electron Diffraction and High-Resolution Electron Microscopy of Mineral Structures instantly.

#### **Laura Dumas:**

Playing with family in a park, coming to see the marine world or hanging out with pals is thing that usually you may have done when you have spare time, then why you don't try matter that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Electron Diffraction and High-Resolution Electron Microscopy of Mineral Structures, you could enjoy both. It is fine combination right, you still need

to miss it? What kind of hang-out type is it? Oh come on its mind hangout folks. What? Still don't buy it, oh come on its called reading friends.
